

## **HOT MELT STICK AE – 150**

### **DESCRIPTION**

AE – 150 is a white, medium viscosity and moderately fast setting hot melt glue stick. It is designed to be a dual temperature glue stick, which can be used either in a low temperature or regular temperature glue gun. AE – 150 is suitable for bonding between plastic, fabric, metal, wood, ceramic and paper. AE – 150 also exhibits excellent low temperature bonding characteristics.

**Basic Material** : Synthetic Resin (Ethylene Vinyl Acetates)

**Physical Properties** : Appearance : White glue stick

Viscosity (Brookfield Thermosel, Model RVDV – III Spindle No 27)		
<u>Temperature ( °C)</u>	<u>Average (cps)</u>	<u>Viscosity (cps)</u> <u>Variance (cps)</u>
170 °C	4500	700

Softening Point ( °C) : 85 +/- 3 (Ring and Ball)  
Set Time : 5 ~ 8 seconds  
Open Time : 15 ~ 20 seconds  
Water Resistance : Excellent  
Application Temp. : 120 °C to 190 °C

**Precautions** : Keep unused adhesives in closed carton and away from dusty area.  
Gue applicator is hot, avoid touching any part of the applicator other than its glue tank handle when adding new glues.

**Application Method** : Hot Melt Gun.

**Packaging** : 25 Kgs per carton.
